

Transportation Improvement Program

FY 2021-2024

Final Report Adopted: August 28, 2020

Transportation Improvement Program

FY 2021 - 2024

Final Report Adopted: August 28, 2020

This document has been prepared by the Region 1 Planning Council in collaboration with its member agencies, partnership organizations, and local stakeholders.

This report was prepared in cooperation with the following:

U.S. Department of Transportation Federal Highway Administration Federal Transit Administration Illinois Department of Transportation

The contents, views, policies, and conclusions expressed in this report are not necessarily those of the above agencies.

Part 1: Introduction

Each year, Region 1 Planning Council (RPC), acting as the Rockford Metropolitan Planning Organization (MPO), develops a Transportation Improvement Program (TIP). The purpose of the TIP is to document infrastructure and non-infrastructure transportation projects programmed within the Rockford metropolitan planning area (MPA) for the next four fiscal years. This includes all surface transportation projects receiving Federal and State funding, projects of regional significance, and public transportation operations and/or capital.

The following document contains all planned improvements for the surface transportation system, as well as public transportation, within fiscal years 2021 to 2024 (July 1, 2020 through June 30, 2023). As required, under 49 U.S.C. 5303(j), this TIP is fiscally constrained ¹ and is consistent with the Metropolitan Transportation Plan (MTP) and the Illinois Statewide Transportation Improvement Program (STIP). It should also be noted that while this document is updated on an annual schedule, it is an ongoing work element of the MPO, meaning that it is regularly reviewed and updated throughout the fiscal year.

About Region 1 Planning Council

By Federal law, all urbanized areas over 50,000 persons are required to have an organization that plans and coordinates the decisions regarding the area's surface transportation system called a Metropolitan Planning Organization (MPO). The core functions of the MPO include:

- Establish a fair and impartial setting for regional transportation decision making;
- Identify and evaluate alternative transportation

improvement options;

- Prepare and maintain a Metropolitan Transportation Plan (MTP);
- Develop a Transportation Improvement Program (TIP); and
- Involve the public in all of the above-mentioned functions.

Due to the size of the Rockford urbanized area, the Rockford MPO has an additional designation, known as a Transportation Management Area (TMA). A TMA is an urbanized area with a population of over 200,000 individuals, as defined by the U.S. Census Bureau. MPOs with this designation have additional roles and responsibilities to the core functions identified above, including the development of a congestion management process and project selection for the suballocation of Surface Transportation Block Grant (STBG) funds.

In the Rockford Region, the MPO transportation planning function is housed with Region 1 Planning Council (RPC).² The RPC is a special-purpose, regional government agency designated to coordinate intergovernmental collaboration. This regional model provides an efficient means to promoting a well-informed, comprehensive dialogue that holistically addresses regional issues by fulfilling the needs of government entities for long-range planning, securing funding, and analyzing and providing data in support of regional projects and initiatives. Essential to fulfilling its purpose as a planning commission, RPC is a designated metropolitan planning organization (MPO), economic development district (EDD), geographic information system (GIS), and land bank authority (LBA).

The MPO is empowered and governed by an interagency

agreement known as the MPO Cooperative Agreement that was developed and mutually adopted by the Cities of Rockford, Loves Park, and Belvidere; the Counties of Winnebago and Boone; the Village of Machesney Park; Rockford Mass Transit District; and the State of Illinois acting through the Illinois Department of Transportation (IDOT).

The activities of the MPO are directed by a Policy Committee that consists of the top elected officials from the above entities plus the Deputy Director from IDOT Region 2 and the Chairman of the Rockford Mass Transit District Board. Transportation planning is carried out through a continuing, comprehensive, and cooperative (3-C) planning process. The Policy Committee receives technical recommendations and assistance from a 20-member Technical Committee comprised of planners and/or engineers from the above entities plus various other local partners, such as the Chicago Rockford International Airport and the Rock River Water Reclamation District.

Much of the technical work, of the RPC transportation planning function, accomplished by the MPO, is done by a professional staff under the management of the Director of Metropolitan Planning Organization in close coordination with the RPC Executive Director.

The planning process and planning activities are funded by annual planning grants from the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) with 20 percent matching funds from IDOT through the State Planning Fund (SPF) and through local contributions from the six local municipal agencies which comprise its Policy Committee membership.

Definition of Area

The planning jurisdiction of the MPO is known as the Metropolitan Planning Area (MPA). The MPA boundary

¹ As a fiscally constrained document, the TIP must include sufficient financial information to confirm that projects in those documents can be implemented using committed or available revenue sources, with reasonable assurance that the federally supported transportation system is being adequately operated and maintained.

² Prior to the formation of Region 1 Planning Council in 2018, the MPO for the Rockford MPA was called the Rockford Metropolitan Agency for Planning (RMAP). In some instances, within this document, RMAP may be used when referring to the MPO.

is based upon the Urbanized Area (UZA), as determined by the U.S. Census Bureau, the adjusted Urbanized Area, as determined by the MPO and its partner agencies, plus any other contiguous areas anticipated to be urbanized in the next twenty years. The MPA boundary is developed in partnership with local jurisdictions, local stakeholders, the state, and the MPO Policy Committee. The last update to the MPA boundary occurred after the 2010 Decennial Census, at which point the northeastern portion of Ogle County was included.

Additionally, the RPC regularly coordinates with the State Line Area Transportation Study (SLATS), the MPO for the Beloit, Wisconsin area, due to its adjacency to the north.

Figure 1.1 depicts the MPA boundary for the Rockford area, along with the U.S. Census defined Urbanized Area.

About the **TIP**

As noted previously, the Transportation Improvement Program (TIP) is a federally-required and fiscally-constrained document that is used to track and document all surface transportation and public transportation projects that use federal transportation funding from the Federal Highway Administration (FHWA), the Federal Transit Administration (FTA), and state transportation funding from the Illinois Department of Transportation (IDOT). This TIP has been developed using the 3-C (continuous, cooperative, and comprehensive) planning process, in accordance with 23 U.S.C and 49 U.S.C. Chapter 53.

Fixing America's Surface Transportation (FAST) Act, signed into law on December 4th, 2015, is the most recent, comprehensive federal legislation addressing surface transportation infrastructure planning and investment. The FAST Act authorizes \$305 billion for the following types of projects: highway, highway and motor vehicle safety, public transportation, motor carrier safety, hazardous materials safety, rail, and research, technology, and statistics. It continues previous federal focus on safety, keeps intact the established structure of the various highway-related programs the MPO manages, continues efforts to streamline project delivery, and for the first time provides a dedicated source of Federal dollars for freight projects.

Federal Requirements

The federal requirements for the development and content of the TIP are defined in 23 U.S.C and 49 U.S.C. Chapter 53.

Consistency with Planning Documents

All projects that have been identified in the FY 2021-2024 TIP are consistent and reflect the investment priorities established in the current metropolitan transportation plan, known as the Transportation for Tomorrow (2040): A Long Range Transportation Plan for the Rockford Region (adopted on July 30, 2015). Additionally, the MPO has ensured that projects listed are consistent with the MPO's Coordinated Public Transit- Human Services Transportation Plan (adopted on July 20, 2017), Public Participation Plan for the Rockford Metropolitan Planning Area (adopted on May 3, 2018), the RMTD Paratransit Plan (adopted on July 30, 2015) and IDOT's Statewide Transportation Improvement Program (dated October 2017).

Public Involvement

Last adopted in May 2018, the MPO's Public Participation Plan (PPP) highlights the general procedures and strategies the MPO follows in the development and adoption of all federally-required documents produced by the MPO, including the TIP. Public involvement is welcome at all stages of the TIP process, including the annual development of the document and during program maintenance throughout the year.

The TIP, in one form or another, is an agenda item at nearly every MPO committee meeting held throughout the year. In any typical year, eight to ten Technical Committee meetings and six Policy Committee meetings are held. The MPO informs the public about upcoming committee meetings via announcements that are sent out to an extensive mailing list of active members of the MPO committees, persons who have requested to be notified of meetings and events, and the area's press and media outlets. All agendas and meeting minutes are also posted on the RPC's website, r1planning.org.

More information on the public involvement process for the FY 2021-2024 TIP can be found in Appendix A.

Title VI & Environmental Justice

A significant goal of the MPO is to ensure the delivery of transportation investments are equally distributed across the region, including to areas with high minority populations or areas with a high proportion of individuals with low-incomes. To assure this goal, the MPO conducts a burdens and benefits analysis for Title VI and Environmental Justice (EJ) in relation to the projects listed within the TIP.

As a recipient of federal funds from FHWA and FTA, the RPC complies with the Title VI of the Civil Rights Act and the Environmental Justice Executive Order 12989. The 2015 Certification Review of the MPO completed by FHWA and FTA found the agency to be in compliance with the civil rights requirements. The Title VI and Environmental Justice program is updated every three years and was last adopted on February 28, 2019.

The full burdens and benefits analysis for the FY 2021-2024 TIP can be found in Appendix B.

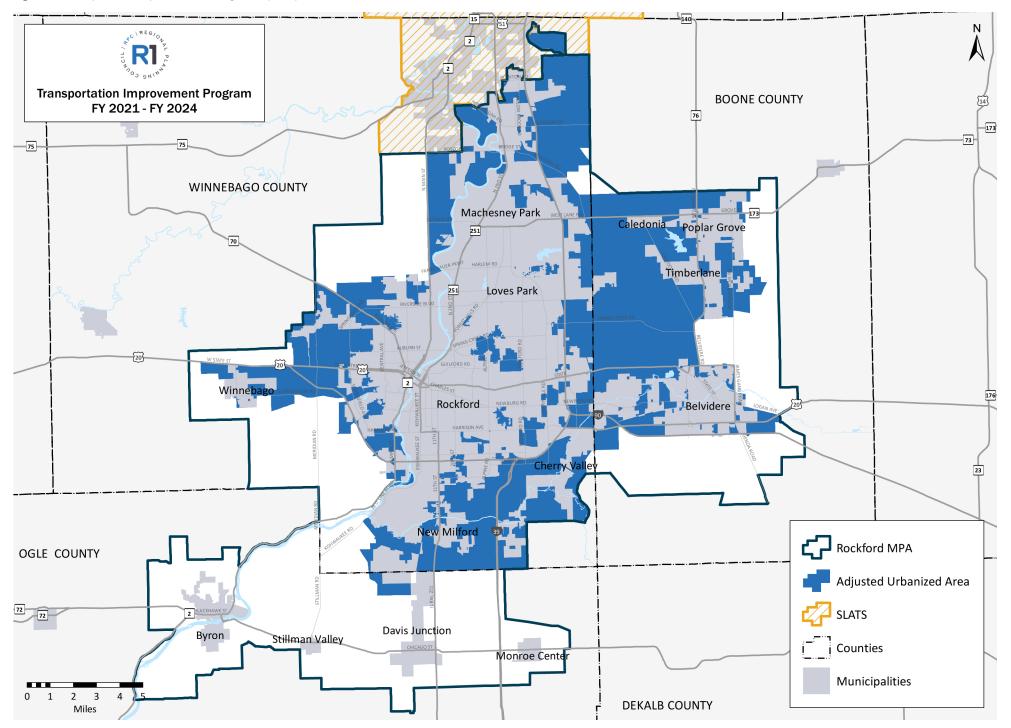

Clean Air Act Conformity

Pursuant of the Clean Air Act, the U.S. Environmental Protection Agency (EPA) may designate urbanized areas as attainment or nonattainment areas, based on the levels of a given criteria air pollutant (e.g., ozone, carbon monoxide, PM_{10} , $PM_{2.5'}$ and nitrogen dioxide) as outlined in the National Ambient Air Quality Standards (NAAQS). Attainment areas meet the health-based NAAQS for a particular pollutant, while nonattainment areas do not meet those standards for one or more of pollutants.

Nonattainment areas do have additional federal planning requirements which must be met, such as the development and implementation of a special plan to meet the standard in order to maintain some forms of Federal financial assistance, specifically set aside to address air quality issues.

The Rockford MPA is currently designated as an attainment area, meaning the air quality meets the standards of the NAAQS and as a result, residents may have fewer instances of discomfort for particulate allergies or respiratory-related issues. However, the MPO and its partner organizations are respectful of air quality concerns and always attempt to promote and implement transportation projects which

Figure 1-1. Map of Metropolitan Planning Area (MPA)

will help to maintain and protect the current urban area attainment standing with the U.S. EPA.

Congestion Management Process

As a designated TMA, the MPO must develop a systematic approach to effectively address congestion issues through the use of travel demand reduction and operational management strategies, known as the congestion management process (CMP). Strategies identified in the CMP could include the following: bicycle and pedestrian projects, public transportation, intersection improvements, signalization modernization projects, projects involving intelligent transportation system (ITS) elements, the selective addition of new lane miles to close key gaps, and the creation of logical termini in the roadway network.

Although the MPA has little congestion, except at certain intersections during peak traffic times and after large cultural or recreational events (nonrecurring congestion), managing these incidences is a goal of the MTP and plays an important role in the MPO's planning process. The CMP is discussed and outlined as a strategy for the region in the MTP and is considered as projects are programmed in this TIP. Projects of this nature are identified in this document by an asterisk (*).

Performance Measures

In 2012, the Moving Ahead for Progress in the 21st Century (MAP-21) transportation law instituted a national performance measure system for highway and transit programs, which continued under the FAST Act. As a result, MPOs are now required to incorporate a performance-based approach to transportation planning and programming by establishing performance targets to address select federal performance measures for infrastructure conditions, safety, and congestion/system performance, established in 23 C.F.R. 490; as well as transit asset conditions established under 49 C.F.R. 625 and 630.

Within the TIP, the MPO includes a description of the anticipated effect of the TIP towards achieving the performance measures and how investment priorities are linked to those targets. The following are the federal performance measures:

- Highway Safety Performance Measures (PM1),
- Pavement and Bridge Performance Measures (PM2),
- System Performance Measures and CMAQ (PM3),
- Transit Asset Management (TAM), and
- Public Transportation Agency Safety Plan (PTASP).

On May 3, 2018, the MPO Policy Committee adopted the "Intergovernmental Agreement between IDOT, Region 1 Planning Council (MPO), Rockford Mass Transit District (RMTD), and Boone County". The intergovernmental agreement establishes that the four identified agencies will coordinate and development a performance-based approach to planning in order to address the performance measures, as required in 23 CFR 450.314(h). This agreement defines the rights and obligations of each agency in terms of developing and sharing data related to transportation performance management and transit asset management, performance target setting, reporting of performance targets, and tracking progress towards attaining set performance targets.

Tables 1.1 through 1.4 currently reflect the complete list of adopted targets, projects the potentially addressing each target, and a description of the anticipated effect of local projects toward achieving the performance targets.

	MPO Baseline		IDOT Baseline		
	5-Year Avg		5-Year Avg

NOTE: The MPO Policy Committee adopted Resolution 2019-3 (02/28/2019) in support of the IDOT safety targets (annual targets). The MPO Policy Committee adopted Resolution 2018-16 (10/25/2018) in support of the IDOT targets (2 & 4 year targets) for PM2 and PM3. Performance measures will continue to be tracked from data made available through the Intergovernmental Agreement between IDOT, RIPC MPO, Boone County, and RMTD as well as through the progression of projects listed within this transportation improvement program.

TIP Program Maintenance

Region 1 Planning Council undergoes an annual update of the TIP, but the program has significant flexibility as adjustments may be needed when aspects of transportation projects change. This process is known as the TIP program maintenance. In spring of 2018, the MPO Policy Committee adopted formal guidelines through the "Procedure to Amend and Modify the MPO Transportation Improvement Program" to be followed during the TIP program maintenance process. The purpose of these guidelines is to provide partner agencies an outlined, standardized procedure to maintain major and minor project updates which include changes such as: project cost estimates, project phase completion, and award letting within the TIP's four-year timeframe.

There are two methods of project adjustments that can be made to the TIP: amendments and administrative modifications. Additionally, Advance Construction (AC) is a technique that allows the state to initiate a project using non-federal funds while preserving eligibility to convert to federal-aid funds in the future and are processed as administrative modifications to the TIP. The following sections offer a summary of the MPO's methodology, in alignment with IDOT policy, for modification to the Transportation Improvement Program.

Administrative Modifications

An administrative modification is used when changes to the project information in the TIP are minor and do not require public input, demonstration of fiscal constraint, or a formal approval by the MPO's committees.³ While an administrative modification does not require a formal approval by the MPO's committees, they are notified of any Administrative Modifications to the TIP during their regularly scheduled meetings following the processing of an Administrative Modification. Additionally, all administrative modifications to the current TIP are posted online at r1planning.org/tip. Thresholds have been identified below to outline when an administrative modification to TIP is appropriate.

- 1. Minor revision to project name and/or project extent description.
- 2. Changes to the project total cost or project phase break out costs in a decrease of \leq 10%.
- 3. Minor changes, deletions, or revisions to typographical errors or data entry error.
- 4. Movement of an included project among fiscal years of the TIP. This may include project phases (i.e. construction, engineering) or movement of the entire project.
- 5. Advanced Construction notices for projects currently listed within the TIP as provided to the MPO by the Illinois Department of Transportation (IDOT). More information on Advanced Construction Notices can be found below.

In order to operate in an efficient and practical manner, such minor changes are handled administratively by MPO staff and a memo notice is sent out to relevant agencies.

Amendments

Major revisions to the TIP include addition or removal of a federally- or state-funded transportation project, an increase in project funds, or the addition of funding sources not currently listed for a project. A major revision of the TIP requires a resolution to be formally recommended by the MPO Technical Committee and adopted by the MPO Policy Committee. The thresholds below will be used to determine if an amendment to the TIP is appropriate:

- 1. Changes to the project total cost or project phase break out costs in an increase of funds.
- 2. Changes to the project total cost or project phase break out costs in a decrease of > 10%.
- 3. Changes in federal, state, or local identified funding sources for project(s) currently within the approved TIP.
- 4. Addition of a project into the TIP which is Federally / State funded or regionally significant and is not currently assigned within the approved TIP.
- 5. Deletion of a project from the TIP which is Federally / State funded or regionally significant and is currently assigned within the approved TIP.

Formally adopted and pending amendments to this TIP can be found online at r1planning.org/tip.

Advance Construction

As mentioned previously, advance construction (AC) is a technique that allows the state to initiate a project using non-federal funds while preserving eligibility to convert to federal-aid funds in the future. After an AC project is federally authorized, the State may convert the project to regular federal-aid funding at any time before project close-out, provided federal funds are available for the project at the time of the conversion.

To notify MPOs of a project entering or leaving AC, the State (IDOT) sends an e-mail to the MPO requesting that the TIP be updated to reflect AC status. Once the MPO has completed the update to the TIP through an administrative modification, they notify IDOT through the confirmation link provided in the initial request e-mail. The same e-mail notification and confirmation process is used when AC status is removed from a project.

For formal documentation purposes, MPO staff drafts a memo detailing the Advanced Construction request. Once completed by MPO staff, the memo is forwarded to the IDOT, as well as the project's sponsoring agency. A table of projects that have entered into or been removed from Advanced Construction are listed online at r1planning.org/ tip.

³ Illinois Department of Transportation. Office of Planning and Programming. Metropolitan Planning Organization Cooperative Operations Manual. July 14, 2017 ed.

Part 2: The Financial Plan

Federal requirements stipulate that a financial plan be included in the Transportation Improvement Program (TIP) that demonstrates how the approved TIP can be implemented using public and private sources that are reasonably expected to be made available to carry out the TIP. The financial plan detailed below uses revenue and cost estimates that apply an inflation rate to reflect yearof-expenditure (YOE) dollars.

Forecasting future funding levels requires a large number of assumptions to be made, including the federal transportation programs, such as the Surface Transportation Block Grant (STBG), and local revenue sources, such as motor fuel taxes (MFT), will continue at the same levels through FY 2024 as in past trends. It is typical for certain types of funding to fluctuate from one fiscal year to another.

Total funding for this TIP is \$423.1 million, an increase of \$20.7 million (5.1 percent) when compared to the FY 2020 - 2023 TIP. Figure 2.1 illustrates the estimates of public (federal, state, and local) funding by source for FY 2021-2024. Table 2.1 illustrates the estimate of revenues anticipated to be available for the projects listed within this TIP by source and year. These estimates have been derived from the actual apportionments for the current fiscal year, which serves as the baseline. As illustrated in Table 2.1, a combination of federal, state, and local funds are utilized for both highway and transit projects identified within the TIP. These sources are summarized below.

FUNDING AVAILABLE

Appendix C lists funding sources available for highway and transit projects, current as of the publication of this document, and are subject to adjustment based on changes to federal and state transportation programs.

PROJECT PRIORITIZATION

Region 1 Planning Council (RPC), in its capacity as the Metropolitan Planning Organization (MPO) for the Rockford metropolitan planning area (MPA), is responsible for allocating and programming various federal and state transportation funding programs. Fixing America's Surface Transportation (FAST) Act provides the suballocation of certain federal funds to urbanized areas, in which MPOs are responsible for prioritizing and programming projects eligible to receive said funding.

The Surface Transportation Block Grant (STBG) and the Transportation Alternatives (TA) Set-Aside are two of the primary federal funding programs provided to the MPO for

the region to implement roadway-related and alternative transportation projects identified in the Metropolitan Transportation Plan (MTP). Project selection for the programming of these funds is done through the authority of the MPO Policy Committee. Additionally, the MPO, in coordination with Rockford Mass Transit District (RMTD), also programs the Federal Transit Administration (FTA) Section 5310 funds in the MPO TIP to improve mobility for seniors and individuals with disabilities through expanding public transportation programs or services.

For each of the above mentioned funding sources, the MPO has adopted a formal process for prioritizing and programming eligible projects to receive the funds.

Surface Transportation Block Grant (STBG)

As mentioned above, STBG¹ is one of the primary federal funding programs for the region to implement transportation projects identified in the MTP. The STBG program promotes flexibility in state and local transportation decisions and provides funding to best address the region's transportation needs. This program funding may be used by states and localities for projects to preserve and improve the conditions and performance on Federal-aid highways, pedestrian and bicycle infrastructure, transit capital, planning projects, and intercity passenger projects.

STBG funding is annually allocated to the Rockford Urbanized Area through the Illinois Department of

Table 2-1. Total Programmed Funds

Fund Category	FY 2021	FY 2022	FY 2023	FY 2024	FY 2021 - 2024
Federal - Highway	\$53,212	\$35,151	\$37,264	\$9,988	\$135,615
Federal - Transit	\$61,168	\$2,174	\$5,226	\$20,288	\$88,855
State*	\$24,597	\$8,004	\$21,449	\$2,552	\$56,603
Local*	\$25,976	\$24,320	\$34,645	\$57,075	\$142,016
Total Programmed Funds	\$164,953	\$69,648	\$98,584	\$89,903	\$423,088

* State and local funding categories includes state funds for both highway and transit projects.

¹ The federal funding program has been referred to by several different names over the past few decades. Prior to the 1990s, this funding source was referred to as Federal Aid Urban (FAU) funding. With the passage The Intermodal Surface Transportation Efficiency Act (ISTEA) in 1991, the funding source was referred to as Surface Transportation Program-Urban (STP-U). The FAST Act, passed in 2015, now refers to the program as the Surface Transportation Block Grant (STBG).

Table 2-2. STBG: Allocations

Fiscal Year	Allocation
2011	\$2,010,663
2012	\$2,916,175
2013	\$2,432,353
2014	\$2,917,864
2015	\$2,483,239
2016	\$2,556,386
2017	\$2,803,472
2018	\$2,894,698
2019	\$2,954,807
2020	\$3,023,540
2021	\$3,272,407
2022*	\$3,272,407
2023*	\$3,272,407
2024*	\$3,272,407

* FY2021- 2023 are subject to change.

Transportation's (IDOT) distribution formula.² The MPO's share is on average an estimated \$2.9 million per year. The funding allocated for FY 2021 is \$3,272,407. Table 2.2 details the STBG allocations that have been received, as well as projected by year.

In May 2017, the MPO Policy Committee adopted a formal procedure and criteria for the selection of projects to receive STBG funding, as outlined in the Surface Transportation Block Grant Program Project Selection Criteria and Programming Process. The MPO Policy Committee adopted revisions to the programming and selection criteria via MPO Resolution 2019-12 (August 29th, 2019). Generally speaking, the MPO attempts to steer these funds toward projects that are regionally significant. Entities requesting the use of these funds are required to submit detailed proposals that describe the costs and benefits of the proposed projects. The reorganization of the STBG process was designed to ensure that projects which have regional

significance for multiple communities are prioritized. The final decisions on which projects are selected are based on the adopted prioritization methodology. The MPO attempts to ensure that all jurisdictions in the area receive some benefit from the use of these funds. As of May 2020, the current unobligated STBG balance for the Rockford TMA is \$6,481,207.08, as provided by IDOT.

Transportation Alternatives Program (TAP)

The Transportation Alternatives Program (TAP) was first authorized under the Moving Ahead for Progress in the 21st Century Act (MAP-21) and reauthorized as the Transportation Alternatives Set-Aside under the FAST Act. This program was designed to provide funding for programs and projects that expand transportation choices with a focus on non-traditional transportation projects, including bicycle and pedestrian facilities; safe routes to school programs and projects.

An established procedure and criteria is utilized by the MPO for the selection of projects to be funded with the portion of TAP funds annually allocated to the Rockford Urbanized Area through IDOT. The project selection criteria can be found in the Transportation Alternatives Program Guidance and Application Packet. The procedures and criteria developed by the MPO ensures that selected projects will have regional significance and will further the goals, objectives, and projects outlined in Transportation Plan for The Rockford Region, Bicycle and Pedestrian Plan for the Rockford Metropolitan Area, and Greenways: A Green Infrastructure Plan for Boone and Winnebago Counties.

TAP funding is annually allocated to the region with an average estimate of \$320,000 per year. The funding allocated for FY 2021 has not yet been released by IDOT.

Section 5310

Section 5310 funding, titled the "Enhanced Mobility of Seniors and Individuals with Disabilities Program", provides formula funding to states and designated recipients of Urbanized Areas with populations of 200,000 or more to improve the mobility of seniors and individuals with disabilities. RMTD and IDOT are the co-designated recipients for Section 5310 funding allocated to the Rockford Urbanized Area. While not directly allocated to the MPO, in coordination with RMTD, the MPO has created a process to help determine the best use of the Section 5310 funds received.

The regional allocation process begins with a call for projects. The MPO utilizes IDOT's Consolidated Procurement program (CVP) for the application because it contains a comprehensive listing of forms and information, is required by IDOT in the latter stages of the process, and prepares applicants to apply for additional statewide funding if the program is again opened up to agencies that fall within an urbanized boundary.

As part of the process to program Section 5310 funding, the MPO will review each applicant's submission, received during the call for projects, to determine that the projects meet federal requirements. While the MPO does not formally score any of the applications for vehicles, the MPO's Alternative Transportation Committee (ATC) screens applications for HSTP compliance. The ATC will provide a program recommendation to the MPO Technical Committee, which will then provide a recommendation to the Policy Committee. Once projects have been approved by the Policy Committee, the MPO then transmits the applications and corresponding TIP amendment(s) to IDOT. This funding is by no means certain, but there is a reasonable chance that a significant portion of the requests could be granted.

² The distribution formula for STBG funding can be found in the Appendix F of the IDOT Metropolitan Planning Organization Cooperative Operations Manual.

		Total	Obligated	Percent of Project	
Past Project	Agency	Project Cost	STBG Funds	Funded with STBG	Status
1 Harrison Avenue Bridge	Rockford	\$3,303,450	\$2,319,352	70%	Complete (1975)
2 Five-Points Intersection	Rockford	\$1,137,964	\$738,829	65%	Complete (1976)
3 Resurfacing: Segments of 20th St & Sandy Hollow	WCHD	\$131,955	\$92,522	70%	Complete (1979)
4 Harrison Ave: S Main St to Kishwaukee St	Rockford	\$1,297,861	\$910,801	70%	Complete (1977)
5 Harrison Ave: Alpine Rd to Perryville Rd	WCHD	\$2,378,713	\$1,670,094	70%	Complete (1978)
6 Resurfacing: Segments of nine streets	Rockford	\$1,417,683	\$995,355	70%	Complete (1978)
7 15th Avenue Bridge	Rockford	\$1,341,967	\$1,008,891	75%	Complete (1980)
8 Windsor Rd: N 2nd St to Alpine Rd	Loves Park	\$1,148,363	\$863,340	75%	Complete (1982)
9 Alpine Rd / US 20 Interchange	IDOT	\$2,255,463	\$1,695,657	75%	Complete (1984)
10 High Crest Rd: Spring Creek Rd to Alpine Rd	Rockford	\$1,755,622	\$1,000,000	57%	Complete (1983)
11 E Riverside Blvd: Mulford Rd to I-90	Joint*	\$2,979,570	\$2,037,570	68%	Complete (1988)
12 Harlem Rd: N 2nd St to Alpine Rd	IDOT	\$3,442,956	\$2,280,000	66%	Complete (1990)
13 Harlem Rd: Alpine Rd to Forest Hills Rd	IDOT	\$5,207,865	\$3,465,653	67%	Complete (1993)
14 Harrison Ave: West State St to Montague Rd	WCHD	\$14,207,125	\$9,477,763	67%	Complete (2002)
15 Harrison Ave: Mulford Rd to Ohio Parkway	Rockford	\$14,150,631	\$11,646,554	82%	Complete (2008)
16 Harrison Avenue: 20th Street to 9th Street	Rockford	\$24,439,830	\$13,840,000	57%	Complete (2018)
17 Bell School Road @ East State Street / US Bus 20	WCHD	\$5,766,050	\$4,612,840	80%	Complete (2016)
Total		\$86,363,068	\$58,655,221	68%	

*East Riverside Boulevard project was a joint effort of the City of Loves Park, City of Rockford, and Winnebago County Highway Department.

NOTE: Under the guidleines of the ISTEA, TEA-21, SAFETEA-LU, MAP-21, and FAST Act, the TIP must demonstrate that the MPO has sufficient STBG-URBAN funds programmed for the projects identified. The MPO has revised the STBG application and selection process as adopted by the MPO Policy Committee (via MPO Resolution 2019-12). Future project selection will follow the "Project Selection Criteria and Programming Process for MPO STBG Funds" application as well as requirements of current Federal Transportation Law. The MPO Policy Committee has the authority in final selection of projects receiving STBG funds.

Table 2-4. TAP: Active & Programed Projects

		Total	Obligated	% of Project	
Active & Proposed Projects	Agency	Project Cost	TAP Funds	Funded with	Status

		\$549,792	\$549,792	100%	

NOTE: A portion of IDOT's Transportation Development Credits will be used as leverage to use the Federal Funds at 100%.

Part 3: Overview of the FY 2021 - 2024 TIP

The FY 2021-2024 TIP lists all projects that will utilize federal funds, as well as non-federally funded projects that are regionally significant, including highway, public transit, bicycle, and pedestrian projects, as well as intelligent transportation system (ITS) and freight-related projects over the next four fiscal years. The MPO operates on the State of Illinois fiscal year schedule, meaning that the FY 2021-2024 TIP begins on July 1, 2020 and ends on June 30, 2023.

The following section provides an overview of the scope of the projects included in this document, the partners involved in its development process, and an explanation of the FY 2021-2024 Highway and Transit Elements.

Scope of Projects

The FY 2021-2024 TIP contains all transportation projects that receive federal and state funds as well as those that are regionally significant regardless of funding source that will occur over the next four fiscal years. Regionally significant projects are defined as a transportation project that is on a facility which serves regional transportation needs.¹ This includes highway, public transit, bicycle, and pedestrian projects, as well as intelligent transportation system (ITS) and freight-related projects.

While not federally-required to be included with FY 2021-2024 TIP, the MPO has decided to include most locally-sponsored transportation projects within the MPA in order to improve local communication, coordination, and transparency. In some cases, small but similar projects are grouped together – i.e., projects listed as "city-wide local street resurfacing" projects or "city-wide intersection improvements."

Partners Involved in the Process

The MPO coordinates with numerous infrastructure implementation partners in developing and maintaining the TIP.

Illinois Department of Transportation

While the MPO coordinates with various departments within the Illinois Department of Transportation (IDOT) on the TIP, the MPO works closely with IDOT District 2 offices in the programming of any state highway projects that will occur within the Metropolitan Planning Area (MPA).

Municipal & County Governments

The MPO has an ongoing partnership with the municipalities and counties within the MPA to ensure regionally significant projects are programmed within the TIP. These agencies are responsible for the design, engineering, construction, operations, and maintenance of the roadways within their jurisdictions. County staff often assist townships with programming and managing project implementation in the TIP. In total, the MPA consists of three counties, fifteen municipalities, and sixteen townships.

Public Transit Agencies

Four public transit agencies operate within the MPA. The MPO works with agencies that originate public transit services within the MPA to program transit projects receiving federal funds within the TIP document, as well as coordinating other mid- to long-range planning documents, such as the Coordinated Public Transit – Human Services Transportation Plan (HSTP).

 Boone County Public Transportation: Operated by the Boone County Council on Aging (BCCA), offers demand-response services to rural portions of Boone County. Public transit services provided originate within the MPA.

- Lee-Ogle Transportation System (LOTS): Provides demand-response services within the rural communities of Lee and Ogle Counties.
- Rockford Mass Transit District (RMTD): Provides fixed route and complimentary paratransit services to the Cities of Belvidere, Loves Park, and Rockford, and the Village of Machesney Park. Also contracts BCCA to provide demand response service to urban portions of Boone County. Public transit services provided originate within the MPA.
- Stateline Mass Transit District (SMTD): Provides demand-response services to Rockton, Roscoe, South Beloit, Rockton Township, and Roscoe Township. Although SMTD operates within the Rockford MPA, the service originates within the Beloit, Wisconsin MPA.

A number of non-profit organizations also provide specialized transportation services within the region, such as Barbara Olson Center for Hope, Lifescape Community Services, Inc., and Wesley Willows.

Other Agencies

In addition to the above-mentioned governments and agencies, the MPO also regularly collaborates with the following agencies in the development and maintenance of the TIP. These agencies include Boone County Conservation District (BCCD), Chicago Rockford International Airport, Forest Preserves of Winnebago County, Illinois State Toll Highway Authority (ISTHA), and the Rockford Park District (RPD). Due to its adjacency, the RPC also regularly coordinates with the State Line Area Transportation Study (SLATS) on the development of the TIP.

¹ As defined by the Federal Highway Administration. https:// www.fhwa.dot.gov/Planning/glossary/.

Maintenance of the Existing System

It is the general consensus of the region's planners, engineers, and administrators involved in the development of this TIP that the existing system is being adequately maintained and operated, as current funding levels permit, and that maintenance is not being deferred in favor of new construction, equipment, or activity. Operation and maintenance expenditures identified in this TIP include: public transit facilities and equipment; surface repairs, such as resurfacing, striping, sealing; sidewalk repairs, and similar activities essential to the maintenance of the existing system.

Although not all transportation system maintenance activities are listed, it is important to reemphasize that the maintenance and safety of the existing system generally takes precedence over projects which expand the system. Overwhelmingly, the majority of projects listed in the TIP represent projects considered "State of Good Repair" which are projects aimed at maintaining and repairing the current transportation system.

Explanation of the Highway Element

The projects listed in the Highway Element of the TIP are organized by the fiscal year in which implementation is anticipated to begin. There are four categories within the lifecycle of a project programmed within the TIP: the annual element; out years; previously approved; and awarded, initiated, or completed (AIC).

Within the TIP, the projects programmed to be implemented and are awaiting letting within the current year of the TIP (e.g. FY 2021) are located in the annual element.

The three remaining years are referred to as the out years (e.g. FY 2022-2024). Typically, a project will first be programmed in the fourth year of the TIP and advance each year towards the annual element. Projects in the out years are tracked to show how projects are advancing through the TIP until project completion. For instance, with each annual update of the TIP, projects in the fourth and third years will advance to the third and second years, respectively, unless the MPO is notified by the implementing agency that the project has been delayed, moved forward, or cancelled. Projects in the second year will typically move to the annual element.

Ideally, a project will move from the annual element into the AIC category for the next annual update of the TIP. This phase of the highway project's lifecycle demonstrates that construction has been completed, construction has begun, or has been awarded via letting. However, under certain circumstances, a project may need to be moved into the previously approved category due to delay in the letting or award process. This category contains projects that have been adopted by the MPO Policy Committee in a previous TIP, which have been accepted and approved by the FHWA and the FTA, but have not yet been to letting or awarded. These tables are differentiated in the lifecycle of a TIP highway project because at the time of award a project passes out of the planning phase and into implementation.

The typical lifecycles for projects programmed in the TIP are shown in Figure 3.1.

Explanation of the Transit Element

This TIP establishes and documents the short-term liquidity of the Rockford Mass Transit District (RMTD) and Boone County Public Transportation (BCPT) for FY 2021. Commitments in state and local funding, coupled with reasonable Federal projections, assure that RMTD and Boone County Public Transportation will have balanced operating budgets in FY 2021-2024. In summary, the continued short- and long-term operation and capitalization of RMTD and BCPT appears feasible as long

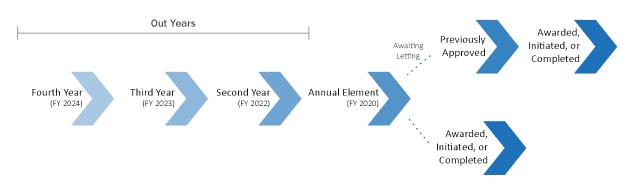

as Congress, the State of Illinois, and local governments continue subsidies within reasonable ranges.

Similar to the Highway Element, the projects listed in the Transit Element of the TIP are organized by fiscal year. There are four categories within the lifecycle of a project programmed within the TIP: the annual element; out years; previously approved; and programmed or completed.

Projects are included in the TIP's annual element or out years when there are reasonably available funding sources, but projects have not yet been placed into a grant. Similar to the Highway Element, under certain circumstances, a project may need to be moved into the previously approved category due to delay in the programming process.

Programmed projects are those with verified funding sources and have been placed into a grant. Completed projects reflect that procurement is completed, received, and/or paid for. In other words, these completed projects have left the planning phases and have entered into the implementation/completed phase. In previous iterations of the TIP, completed projects were assigned "awarded" project status to reflect that a project was programmed in a grant and awarded funding. To further enhance tracking of the transit element and its planning project phases moving forward, awarded projects were reassigned to completed project status and placed into the programmed or completed table.

Figure 3-1. TIP Project Cycle

Part 4: Highway Element

The following highway project tables list all proposed projects programmed over the next four fiscal years. The tables include the following information for each project: project extent, improvement type, funding sources and amounts, and the total project cost. Projects have been grouped by lead agency. Projects listed in the Transportation Improvement Program (TIP) may be identified by a TIP numbering system developed by the MPO. This system consists of the lead agency reference number, the year the project was first programmed in the TIP, and a sequential project number (AA-YY-NN).

Highway projects programmed in the annual element are listed in Table 4.1 and depicted in Figure 4.1. Table 4.2 provides a financial summary of the projects listed in the annual element by both funding sources and improvement types.

A list of major highway projects proposed for FY 2022-2024, along with the respective financial summary tables are provided in Tables 4.4- 4.8, and illustrated in Figures 4.3- 4.5. A financial summary for all highway projects programmed in FY 2021 through FY 2024 is provided in Table 4.9

Previously approved projects are listed in Table 4.10 and illustrated on Figure 4.5. while Table 4.11 lists projects that were previously approved in earlier TIPs and have been awarded, initiated, or completed. The location of these projects, along with their status, are illustrated in Figure 4.6.

Figure 4-6. Awarded, Initiated, or Completed Highway Projects

NOTE: Information on spectific project locations can be found on the Interactive TIP at r1planning.org/tip.

Part 5: Transit Element

The following transit project tables list all proposed projects programmed over the next four years. The tables include the following information for each project: project description, project justification, per unit costs, funding sources and amounts, and the total project cost. Projects have been grouped by funding source. Projects listed in the Transportation Improvement Program (TIP) may be identified by a TIP numbering system developed by the MPO. This system consists of the lead agency reference number, the year the project was first programmed in the TIP, and a sequential project number (AA-YY-NN).

NOTE: The TIP numbering system for transit projects has changed with the annual update of the FY 2020-2023 TIP. Previous transit projects identification numbers were assigned based on the year the project was first programed in the TIP and a sequential project number for the particular funding table in which the project was found. In order to further delineate projects, the new numbering system has been applied to all future transit projects programmed in the TIP.

Appendix B. Title Vi & Environmental Justice Considerations	51
Appendix C. Funding Sources	56
Appendic D. Resolution of Adoption	59

Appendix A: **Public Engagement Process**

Public involvement is an important component in the development and maintenance of the Transportation Improvement Program (TIP) and is welcome at all stages of the process. As outlined in the Public Participation Plan (PPP), adopted by the Metropolitan Planning Organization's (MPO) Policy Committee, the MPO follows general procedures in developing and adopting all federally required documents produced by the MPO, including the TIP. The discussion in this section summarizes the general procedures and steps contained in the PPP pertaining to the TIP.

Public Involvement in the Annual TIP Development

MPO staff typically begins work on the TIP approximately three months prior to the start of the fiscal year, in March and April of each year. The schedule is deliberately extended over several months to provide ample opportunities for public involvement. The annual TIP development schedule is shown in Figure A.1.

Citizens can influence project selection and priority setting in three ways. By scrutinizing the "out year" projects, the public can determine if the projects they believe to be important are included. Although, by Federal law, a project cannot be included in the TIP unless funding is likely to be available, citizens can question why some projects are included and others are not (illustrative projects are the exception to this).

Second, citizens can influence the priority setting (i.e., which projects are advanced to the implementation year). Sometimes a project cannot be hastened because engineering, land acquisition, funding, and/or various components have not been accomplished. But many times, aspects may be adjusted and the time for implementation can be lessened.

Whenever citizens are concerned about the inclusion and/ or priority of a project, they should first contact the specific jurisdiction responsible for implementing the project. A list of TIP implementation agency contacts can be found at r1planning.org/tip.

Public comment is also taken prior to approval of the TIP. The draft document is published and typically made available for comment for 30 days on the Region 1 Planning Council's (RPC) website www.r1planning.org and in the RPC offices. To inform the public of the public comment period, a notice is published on the RPC website and distributed to the RPC's extensive mailing list. Any public comment received during this review period is taken into account by the MPO and is presented to the Technical and Policy Committees as part of the approval process.

If significant changes are proposed to the draft TIP during the comment period, the MPO Policy Committee may even extend the comment period to allow for further public review of the proposed changes. Changes likely to be significant include the addition of a completely new project, the deletion of a project, major cost or funding changes, or changes of priority that bump other projects from the implementation year or from the TIP entirely.

Public Involvement in the TIP Maintenance

In addition to public involvement in the development of the annual TIP, the public is highly encouraged to stay involved during the TIP program maintenance process as well. The TIP, in one form or another, is an agenda item at nearly every MPO Technical and Policy committee meeting held throughout the year. In any typical year, eight to ten Technical Committee meetings and six Policy Committee meetings are held.

Formal amendments to the TIP are listed as agenda items

Figure A-1. Annual TIP Development Schedule

FEBRUARY - MARCH

STAFF REVIEWS PROGRESS REPORTS ON PROJECTS CURRENTLY IN THE TIP, AS WELL AS THE FEDERAL FUNDING SPENT, AVAILABLE, OR FORECASTED, AND ALLOCATED.

RMAP ACCEPTS COMMENTS/INPUT ON SURFACE TRANSPORTATION BLOCK GRANT PROJECT CRITERIA OR PRIORITIES, SUBALLOCATIONS OF FEDERAL TRANSIT SUBSIDIES, AND SPECIAL FEDERAL/STATE FUNDS FOR PARATRANSIT.

PUBLISH PUBLIC NOTICE ANNOUNCING RMAP PLANNING ACTIVITIES, INCLUDING TIP DEVELOPMENT.

APRIL - JUNE

STAFF PREPARES PRELIMINARY DRAFT OF THE NEXT FISCAL YEAR'S TIP.

PRELIMINARY DRAFT RELEASED FOR PUBLIC COMMENT (ANNOUNCED AT COMMITTEE MEETINGS & WEBSITE).

MAY - JUNE

STAFF PREPARES FINAL PROPOSED DRAFT OF THE TIP FOR THE JUNE TECHNICAL & POLICY COMMITTEE MEETINGS.

DRAFT INCLUDES SUMMARY OF THE PUBLIC COMMENTS RECIEVED.

JUNE

PROPOSED TIP PRESENTED TO TECHNICAL & POLICY COMMITTEE FOR ADOPTION.

IF CHANGES TO THE TIP ARE NEEDED, BASED ON COMMENTS RECEIVED, THE POLICY COMMITTEE WILL DETERMINE IF CHANGES ARE SIGNIFICANT ENOUGH TO DELAY ADOPTION & EXTEND PUBLIC COMMENT PERIOD.

BEYOND ADOPTION

PROGRESS ON PROJECTS LISTED WILL BE DISCUSSED AT THE TECHNICAL & POLICY COMMITTEES. CHANGES TO THE TIP WILL GO THROUGH EITHER A FORMAL AMENDMENT PROCESS OR AN ADMINSTRATIVE MODIFICATION (SEE TEXT). for both of those MPO committees, while Administrative Modifications and Advance Construction notices are provided during the MPO agency report to the committees. The MPO informs the public about upcoming committee meetings via announcements that are sent out to an extensive mailing list of active members of the MPO committees, persons who have requested to be notified of meetings and events, and the area's press and media outlets. All meeting agendas and materials that are to be acted upon at any given meeting are also posted on the webpage in accordance with the Illinois Open Meeting Act. This includes the minutes of previous meetings, any drafts of the TIP or TIP portions that are prepared, and all memos or reports on planned or programmed improvement projects.

Revision to the FY 2021-2024 TIP

The public comment and review period for draft FY 2021-2024 TIP was from August 3, 2020 through August 17, 2020. The draft was made available for review via the MPO's website (posted August 3, 2020), as well as at the RPC offices. Since the release of the August 3, 2020 draft TIP, technical and formatting corrections have been made to the text and maps of the document. Any major revisions to the draft version, prior to the adoption of FY 2021-2024 TIP, will be included below.

Appendix B: Title VI & Environmental Justice

The MPO operates under several federal guidelines to ensure the delivery of public transportation services and the priority setting for transportation improvements does not disproportionately distribute the benefits of these publicly-funded activities away from traditionally underserved populations (TUPs). TUPs include low-income, racial/ethnic minorities, Limited English Proficiency, elderly (aged 65 and above), and zero car households. Conversely, these efforts also seek to ensure that potentially adverse consequences of transportation services or improvements are not disproportionately burdened upon TUPs.

Title VI of the 1964 Civil Rights Act (42 USC 2000d-1) states that, "No person in the United States shall, on the grounds of race, color or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." Title VI bars intentional discrimination as well as disparate impact discrimination (i.e., a neutral policy or practice that has a disparate impact on protected groups).

Environmental Justice (EJ) is an amplification of Title VI that extends the basic principles of Title VI to low-income populations. Recent emphasis on EJ stems from the 1994 Executive Order 12898 that states, "Each Federal agency shall make achieving environmental justice part of its mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minority populations and low-income populations." In 1997, the US Department of Transportation (USDOT) issued its Order to Address Environmental Justice in Minority Populations and Low-Income Populations to summarize and expand upon the requirements of Executive Order 12898.

To fulfill and expand upon the federal guidelines, this TIP recognizes the following goals as part of its transportation

project selection and priority setting process:

- Minority and low-income populations along with other traditionally underserved populations (TUPs) should be allocated a fair share of transportation expenditures and services programmed in this TIP.
- TUPs should not be burdened with a disproportionate share of the adverse impacts originating from the transportation projects in this TIP.
- In the process of developing this TIP, a concerted effort will be made to determine what populations are going to be affected by the projects in this TIP.
- In follow-up to this TIP, the MPO will periodically review and analyze past projects and transportation decisions to determine if all groups have been treated equitably.
- MPO and its participants will make concerted efforts to inform and involve traditionally underserved population groups in the transportation decision-making process.

Figure B.1 illustrates the census block groups with higher than a regional average TUPs. The U.S. Census' 2018 American Community Survey (ACS) 5-Year Estimates, were used to calculate the thresholds for each TUP. A threshold represents the overall concentration of a population across the entire metropolitan planning area. Using the thresholds established, the census block groups were then categorized by how many thresholds they exceeded. This allows the census block groups to be mapped showing the concentration of the identified populations.

All updates to the MPO's Metropolitan Transportation Plan (MTP) and TIP will include a map of proposed projects overlaying these concentrations to assess any benefits and burdens on TUPs (shown in Figure B.2). The presence of

these populations is also used as a weight in the selection process and programming of the Surface Transportation Block Grant and Transportation Alternatives Program funds allocated to the region.

Table B-1 displays the breakdown of the FY 2021-2024 TIP projects, in which specfic locations are identified, by improvement type and threshold category. Data shows that majority of programmed projects are located within or adjacent to least one of the block groups that has reached at least one of the thresholds. Projects planned for the FY 2021-2024 have a planned total amount of the \$267,587,515. Of these projects, 92.5 percent of the funds are used in areas that have reached at least one of the thresholds. When specifically viewing "Previously Approved Projects" and "Awarded, Initiated, or Completed Projects" with state or federal funding there is \$110,857,145. Of this total amount, 100 percent, or \$109,966,174 is within areas that have reached at least one or more thresholds for FY 2021-2024 TIP.

The benefit and burden analysis provides feedback on the equity of the projects within the MTP and the TIP, by performing a high level examination of the impact they may have on TUPs, and identifying any disproportionate impacts. Table B-2 gives possible benefits, burdens, and mitigation strategies based on proposed project types. Project specific context and related measures are reviewed by the implementing partner agencies.

Taken in whole, the projects in the FY 2021-2024 TIP, do not impose disproportionately high and adverse impacts on TUPs. Furthermore, the benefits of the transportation services and improvements proposed are reasonably distributed to serve the mobility and accessibility needs of all population groups within the MPO Planning Area. The full in-depth analysis of EJ thresholds and TIP projects can be found in the "Considerations for Title VI & Environmental Justice" document.

Reduce reliance on motor vehicles and improve air quality.

Increase mobility and safety for TUP.

Project Type	Possible Benefits	Possible Burdens	Possible Mitigation Strategies
Multi-modal Connections ITS Improvements	Enhance mobility & accessibility.	Funding for ITS implementation might not be available.	Multi-modal incorporates transit stations & other modes.
CMS Strategies	Improve safety.		Have a comprehensive design phase before any ITS projects are implemented.
	Enhance system preservation & operational efficiency.		

Temporary bus route deviations may be burdensome.

Appendix C: Funding Sources

Some of the key funding programs are described below. This is not a comprehensive list of all of the federal, state, or local financing programs, but includes the most commonly used within the region.

Federal 319 Grant Program

Established under the 1987 amendments to the Clean Water Act, the 319 Grant Program provides funding to states and territories to support a wide variety of activities including technical assistance, financial assistance, education, training, technology transfer, demonstration projects and monitoring to assess the success of specific nonpoint source implementation projects. The Illinois Environmental Protection Agency (EPA) is the designated state agency in Illinois to received 319 federal funds from the U.S. EPA. It is a competitive grant program with a 40 percent local match requirement.

Capital Investment Grants (CIG)

Capital Investment Grant (CIG) is a discretionary grant program that funds transit capital investments, including heavy rail, commuter rail, light rail, streetcars, and bus rapid transit. There are four categories of eligible projects under the CIG program: New Starts, Small Starts, Core Capacity, and Programs of Interrelated Projects. Each of these types of projects has a unique set of requirements in the FAST Act. This program requires a 20 percent local match.

Enhanced Mobility of Seniors & Individuals with Disabilities (Section 5310)

Section 5310 provides formula funding to states for the purpose of assisting private nonprofit groups in meeting the transportation needs of older adults and people with disabilities when the transportation service provided is unavailable, insufficient, or inappropriate to meeting these needs. Projects and programs previously under FTA's New Freedom program are eligible for Section 5310 funds. RMTD and IDOT are the co-designated recipients for Section 5310 funding allocated to the Rockford Urbanized Area. While not directly allocated to the MPO, in coordination with RMTD, the MPO has created a process to help determine the best use of the Section 5310 funds received. The program requires a 20 percent local match for eligible capital costs and a 50 percent match for operating assistance.

Grants for Buses and Bus Facilities Formula Program (Section 5339)

Section 5339 provides funding to states and designated recipients to replace, rehabilitate, and purchase buses and related equipment and to construct bus-related facilities including technological changes or innovations to modify low or no emission vehicles or facilities. The program requires a 20 percent local match.

High Risk Rural Roads Program (HRRR) See Highway Safety Improvement Program.

Highway Safety Improvement Program (HSIP)

The Highway Safety Improvement Program (HSIP) is the core Federal-aid program with dedicated funding to achieve significant reductions in traffic fatalities and serious injuries on all public roads. The state of Illinois also has a High Risk Rural Roads (HRRR) program under the HSIP program that provides funds for construction and operational improvements on rural collector and locally-classified roads with fatal and incapacitating injury crash rates above the state average. Both the HSIP and HRRR programs have a competitive selection process and requires a 10 percent local match.

Job Access and Reverse Commute (JARC)

The Job Access and Reverse Commute (JARC) program was established to address the transportation challenges facing low-income persons seeking to obtain and maintain employment. To address those needs, the JARC program funds capital and planning projects and associated operating expenses that transport low income individuals to and from jobs and activities related to employment, and for reverse commute projects. This program has been repealed, however JARC activities are eligible for funding under FTA's Urbanized Area Formula Grants (Section 5307) and the Formula Grants for Rural Areas (Section 5311) programs.

National Highway Freight Program (NHFP)

The Fixing America's Surface Transportation (FAST) Act established a new National Highway Freight Program (NHFP) to improve the efficient movement of freight on the National Highway Freight Network (NHFN). A competitive process is used to select projects to receive funding. While the local match for these funds is typically 20 percent, there are some projects in which the federal share of the project cost may cover 90 to 100 percent, e.g. certain types of improvements (predominately safety improvements).

National Highway Performance Program (NHPP)

The National Highway Performance Program (NHPP) provides funding to use for construction on national highways (including the interstate system and other principal arterials), and for efforts to maintain and repair highways to meet performance targets set in states' asset management plans. While the local match for these funds is typically 20 percent, there are some projects in which the federal share of the project cost may cover 90 of the total costs.

Rural and Small Urban Areas (Section 5311)

FTA's Section 5311 program provides capital, planning, and operating assistance to states to support public transportation in rural areas with populations of less than 50,000, where many residents often rely on public transit to reach their destinations. The local share is 20 percent for capital projects, 50 percent for operating assistance, and 20 percent for Americans with Disabilities Act (ADA) non-fixed route paratransit service.

State of Good Repair Grants (Section 5337)

Section 5337 program provides capital assistance for maintenance, replacement, and rehabilitation projects of high-intensity fixed guideway and bus systems to help transit agencies maintain assets in a state of good repair. Funds are apportioned by statutory formulas and the local match is 20 percent of the net capital project cost.

Surface Transportation Program (STP)

See Surface Transportation Block Grant.

Surface Transportation Block Grant (STBG)

The Fixing America's Surface Transportation (FAST) Act converted the long-standing Surface Transportation Program (STP) into the Surface Transportation Block Grant (STBG). The program is a formula program that provides flexible funding to address both state and local transportation needs. Certain set-asides are required by law, including funding for Transportation Alternatives (TA), State Planning and Research (SPR), and funding for bridges not on the federal-aid highway system. Funds from this pool are also reserved for rural projects on any Federal-aid highway, including NHS, and bridge or safety projects on any public road, known as Surface Transportation Program - Rural (STP-R). The STBG program is administered through the Illinois Department of Transportation programs and locally by the Metropolitan Planning Organization (MPO) and requires a 20 percent local match.

Transportation Alternatives (TA) Set-Aside

The Transportation Alternatives (TA) set-aside of the STBG program provides funding for projects and activities that promote alternative transportation methods, such as

pedestrian and bicycle facilities. The statewide TA program, administered by IDOT has been divided into two separate grant programs: Illinois Transportation Enhancement Program (ITEP) and Safe Routes to School Program (SRTS). The ITEP provides funding for community based projects that expand travel choices and enhance the transportation experience by improving the cultural, historic, aesthetic and environmental aspects of our transportation infrastructure. The SRTS program funds programs, both infrastructure-related and non-infrastructure-related projects, that are intended to encourage increase physical activity levels of children in primary and middles schools by making bicycling and walking to school a safer and more appealing transportation alternative. The local TA program, administered by the Rockford MPO, is known as the Transportation Alternatives Program (TAP). Both the ITEP and TAP programs have a competitive selection process and requires a 20 percent local match. IDOT's SRTS program is a competitive selection process and does not require a local match.

Urbanized Area Formula Grant (Section 5307)

FTA allocates Section 5307 funds as subsidies to eligible public transit agencies to use for capital equipment (buses, equipment, structures, etc.), planning, job access and reverse commute projects, and some limited operating expenses related to the Federally-required assistance transit agencies must provide to persons with disabilities. The minimum required local match for capital purposes is 20 percent.

State Illinois Commerce Commission (ICC) Funds

The Illinois Commerce Commission (ICC) provides funding to pay for safety improvements at highway-railroad crossing within the state. For local roads, the Illinois General Assembly created the Grade Crossing Protection Fund (GCPF) to fund the majority of the project costs at highwayrailroad crossings on local roads. Local public agencies can submit applications to ICC throughout the year. Prioritized projects are then selected and incorporated into the ICC's Crossing Safety Improvement Program.

Illinois Department of Natural Resources (IDNR)

Funding authorized by the Illinois Department of Natural Resources to assist with recreational, educational and environmental improvements and projects.

Illinois Department of Transportation (IDOT)

Funding authorized by the Illinois Department of Transportation to assist with transportation-related projects and programs for a source other than those listed.

Illinois Major Bridge Program (IMBP)

The Illinois Major Bridge Program (IMBP), now known as the Illinois Special Bridge Program, provides funding for construction and construction engineering of local public agency bridges which are estimated to cost more than one million dollars to rehabilitate or replace. Eligible structures must be greater than 20 feet in length and a sufficiency rating less than 80 for rehabilitation and 50 for replacement. This program requires a 20 percent local match.

Illinois Transportation Enhancement Program See Transportation Alternatives (TA) Set-Aside.

Recreational Trails Program (RTP)

The Recreation Trail Program (RTP) provides funds to develop and maintain recreational trails and trailrelated facilities for both non-motorized and motorized recreational trail use. As defined by FHWA, recreational uses include hiking, bicycling, in-line skating, equestrian use, cross-country skiing, snowmobiling, off-road motorcycling, all-terrain vehicle riding, four-wheel driving, or using other off-road motorized vehicles. This program has an annual competitive selection process and requires a 20 percent local match.

Safe Routes to School

See Transportation Alternatives (TA) Set-Aside.

Statewide Planning and Research (SPR)

Statewide Planning and Research (SPR) funds are used to establish a cooperative, continuous, and comprehensive (3-C) framework for making transportation investment decisions and to carryout transportation planning and research activities throughout the State.

Truck Access Route Program (TARP)

The Truck Access Route Program (TARP) assist local agencies to upgrade pavement design of roadways to accommodate the 80,000-pound truck loads. Funds are awarded through a competitive selection process. State funding will not exceed 50 percent of the total construction cost or \$900,000, whichever is less.

Local

Illinois State Toll Highway Authority (ISTHA)

Funding or improvements to I-90 and other toll highways under the jurisdiction of Illinois State Tollway Highway Authority.

Local

Local funding derived from a source other than those listed.

Motor Fuel Tax (MFT)

Motor fuel tax (MFT) funding is derived from a tax on all volatile liquids compounded or used for fueling motor vehicles for the privilege of operating motor vehicles upon public highways. The current state motor fuel tax rate is 38 cents per gallon of gasoline/gasohol and 45 cents per gallon of diesel fuel. IDOT allocates MFT funds to counties, townships, and municipalities as outlined in the MFT fund distribution statue, 35 ILCS 505/8.

Private

Funding committed from a private landowner, developer or freight rail facility owner.

Retail Sales Tax (RST)

Retail sales taxes allows local and state governments to collect funds for a consumer of certain goods or services at

the point of purchase. RST rates vary depending upon the jurisdiction in which the purchase was made.

Special Assessment (SA) Funds

Special Assessment (SA) funding is derived from special property taxes, which are assessed and assigned for a specific improvement.

Tax Increment Financing (TIF) District

Tax increment financing is a public financing method that is used as a subsidy for redevelopment, infrastructure, and other community-improvement projects. TIF funds usually are a small portion of the overall project costs and are meant to close the gap between conventional bank financing, the owner's funds and the project's costs.

Appendix D: **Resolution of Adoption**

COLLABORATIVE PLANNING FOR NORTHERN ILLINOIS

REGION 1 PLANNING COUNCIL MPO POLICY COMMITTEE

MPO RESOLUTION 2020-07

- ADOPTION OF THE FY 2021-2024 TRANSPORTATION IMPROVEMENT PROGRAM RE:
- the Federal Highway Act of 1962, as amended, and the Urban Mass Transportation Act of 1964, as amended, provide WHEREAS for an urban transportation planning process; and
- WHEREAS the Fixing America's Surface Transportation (FAST) Act currently authorizes funding to improve our nation's transportation system for highways, highway safety, public transit, alternative non-motorized forms of transportation, and freight; and
- the Fixing America's Surface Transportation (FAST) Act and its predecessors, require a Metropolitan Transportation WHEREAS Plan (MTP) as well as a Transportation Improvement Program (TIP); and
- WHEREAS the Region 1 Planning Council is the Metropolitan Planning Organization (MPO) for the Rockford Urban and Metropolitan Area, and the MPO Policy Committee has the specific responsibility to direct and administer the continuing urban transportation planning process: and
- WHEREAS the Transportation Improvement Program (TIP) for the Rockford Metropolitan Area has been developed in accordance with the Intermodal Surface Transportation Efficiency Act of 1991, the Transportation Equity Act for the 21st Century, the Safe, Accountable, Flexible, Efficient Transportation Equity Act: a Legacy for Users, the Moving Ahead for Progress in the 21st Century Act; and the Fixing America's Surface Transportation (FAST) Act; and
- WHEREAS the development of the TIP is a continuing, comprehensive and cooperative transportation planning process carried out by the MPO under the direction of the Policy Committee and the Technical Committee of the MPO of the Rockford Metropolitan Area in cooperation with the Illinois Department of Transportation (IDOT); and
- WHEREAS the planning process is being carried on in conformance with all applicable Federal and State requirement, as listed in the Annual Metropolitan Transportation Planning Process Certification; and
- WHEREAS citizens, affected public agencies, representatives of transportation agencies, private providers of transportation, and other interested parties have been given opportunities to comment on this TIP during its development cycle; and
- WHEREAS the public comment and review period for draft FY 2021-2024 TIP was from August 3, 2020 through August 17, 2020 and the draft FY 2021-2024 TIP was made available for review via the MPO website (posted August 3, 2020) as well as through contacting the MPO offices.
- WHEREAS the MPO Technical Committee has recommended approval of the FY 2021-2024 TIP;

127 N Wyman St, First Floor, Rockford, IL 61101 | 815-319-4180 | info@r1planning.org

BE IT FURTHER RESOLVED
that the MPO staff is instructed to distribute the FY 2021-2024 Transportation Improvement Program in accordance
with the MPO Public Participation Process.
Dated this 27 th day of August 2020.
Greg Jury, MPO Chairman
Mayor
City of Loves Park
Karl Johnson, MPO Vice-Chair
Boone County Board Chairman
Boone County
Mike Chamberlain
Mayor
City of Belvidere
Steve Johnson
Mayor
Village of Machesney Park
whole of Macheshey Fark
Tom McNamara
Mayor
City of Rockford

the MPO Policy Committee adopts the August 27, 2020 version of the FY 2021-2024 Transportation Improvement Program, along with the changes, if any, as to be documented in the minutes of this August 27, 2020 meeting; and

> Frank Hanev Winnebago County Chairman Winnebago County

Pastor Herbert Johnson, Board Chair Rockford Mass Transit District

Masood Ahmad Deputy Director Illinois Department of Transportation, Region 2

NOW, THEREFORE, BE IT RESOLVED THAT

Transportation Improvement Program: FY 2021 - 2024 | 59
