Call for Projects: MPO-Attributable Federal Funding

ROCKFORD, IL — Notice is hereby given that the Region 1 Planning Council (R1), the federally-designated Metropolitan Planning Organization (MPO) for the Rockford Urban and Metropolitan Area, is seeking eligible projects for the programming of Surface Transportation Block Grant (STBG), Transportation Alternative Program (TAP), and Carbon Reduction Program (CRP) funds.

This Call for Projects is from October 15, 2024, through November 29, 2024. Completed applications must be submitted through the online portal no later than 4:30pm on Friday, November 29, 2024. At this time the MPO intends to review applications for FY 2025-2029 apportionments allocated to the Rockford Urbanized Area.*

Annual Allocations

Surface Transportation Block Grant (STBG): \$4,538,700

Transportation Alternative Program (TAP): \$622,690**

Carbon Reduction Program (CRP): \$632,630

Application materials can be found at <https://r1planning.org/call-for-projects>.

Questions may be submitted by email, telephone, or mailed to: Sydney Turner, 127 N Wyman St., Suite 100, Rockford, IL 61101, Phone: 815-319-4185 | Email: sturner@r1planning.org

About the MPO-Attributable Federal Funding

The Region 1 Planning Council, in its capacity as the federally-designated Metropolitan Planning Organization (MPO) for the Rockford Region, is responsible for programming federal transportation funding programs allocated to the region. R1 is the recipient of direct sub-allocations of federal funding program, via Infrastructure Investment and Jobs Act (IIJA), including STBG, TAP, and CRP. R1 is responsible for coordinating publicly funded transportation planning and transportation improvements among the various jurisdictions in Winnebago, Boone and Ogle Counties.

Surface Transportation Block Grant

The Surface Transportation Block Grant (STBG) provides flexible funding for a wide variety of projects, including highways and transit. Surface Transportation Block Grant funds are the most versatile and may be used for any project that is recommended in or consistent with the R1 Metropolitan Transportation Plan.

Funds can be used on any federal-aid roadway classified above a local road or a rural minor collector and bridge projects on any public road.

Eligible projects can include highway projects and bridge improvements (construction, reconstruction, rehabilitation, resurfacing, restoration, and operational), transportation system management, public transit capital improvement projects, commuter rail, carpool projects, bus terminals and facilities, bikeways, and pedestrian facilities.

Transportation Alternative Program

The goal of the Transportation Alternative Program (TAP) is to allocate resources to well-planned smaller scale, but critically important projects that provide and support connected alternate modes of transportation that are safe for all users, enhance the transportation system through preservation of visual and cultural resources, and improve the quality of life for members of the communities impacted.

Projects must enhance the transportation system by serving a transportation need or providing a transportation linkage, use, or benefit. Each project or activity must demonstrate a relationship to surface transportation. Project categories include: pedestrian/bicycle facilities (on-road and off-road), sidewalks; conversion of abandoned railroad corridors to trails; streetscapes (stand-alone landscape projects are ineligible); historic preservation and rehabilitation of historic transportation facilities; vegetation management in transportation rights-of-way; archaeological activities relating to impacts from implementation of a transportation project; storm water management, control and water pollution prevention or abatement related to highway construction or due to highway runoff; reduce vehicle-caused wildlife mortality or restore and maintain connectivity among terrestrial or aquatic habitats; and construction of turnouts, overlooks, and viewing areas.

Carbon Reduction Program

IIJA establishes the Carbon Reduction Program (CRP), which provides funding to projects and programs that reduce transportation emissions. Funding can be used for a wide range of projects that support this goal, including: operational projects that improve traffic flow, such as the construction of roundabouts, left-turn lanes or other managed lanes; intelligent transportation systems; certain traffic control measures, such as traffic signal coordination, intersection improvements, and incident management; construction of bicycle and pedestrian facilities; promotion of alternative travel modes, including ridesharing; acquisition, installation, or operation of publicly accessible electric vehicle charging infrastructure or hydrogen, natural gas, or propane vehicle fueling infrastructure; construction of a bus rapid transit corridor or dedicated bus lanes; and purchase of new public transportation facilities and equipment.

*The amounts for FY 2026 - 2029 are subject to change based on future annual allocations.

**Available TAP funding for FY 2025-2026 is \$3,266,383.
