ABOUT THE TIP - Each year Region 1 Planning Council serving as the Rockford Metropolitan Planning Organization (MPO), develops a Transportation Improvement Program (TIP). The purpose of the TIP is to document infrastructure and non-infrastructure transportation projects programmed within the Rockford metropolitan planning area (MPA) for the next four fiscal years. This includes all surface transportation projects receiving federal and state funding, projects of regional significance, and public transportation operations and/or capital.

As noted above, the TIP contains all transportation projects that receive federal and state funds and those that are regionally significant regardless of funding source that will occur over the next four fiscal years. Regionally significant projects are defined as a transportation project that is on a facility which serves regional transportation needs. This includes highway, public transit, bicycle, and pedestrian projects, as well as intelligent transportation system (ITS) and freight-related projects. While not federally-required to be included with TIP, the MPO has decided to include locally-sponsored transportation projects within the MPA in order to improve local communication, coordination, and transparency.

ABOUT R1 - Region 1 Planning Council (RPC) is a special-purpose, regional government agency. Regional councils are public organizations comprised of local elected officials that promote collaboration among local governments, working across the jurisdictional silos of states, counties, and municipalities.
